

BLU Energy X Battery Replacement

Use this guide to replace the phone battery. Be aware that removing the battery will void the phone warranty.

Written By: Sishun Wang

INTRODUCTION

In this guide the user will have to open the back of the phone and remove the top plate to expose the battery connection to the motherboard. Because the battery is not supposed to be removed, there is an adhesive on the back of the battery that makes it difficult to remove from the phone. The metal spudger is the best tool to use to pry the battery from the phone body.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Battery

- Remove the back case using plastic opening tool.

Step 2

- Remove the seven 4mm Phillips #000 screws.
- Remove the top plate.

Step 3

- Detach the battery from the motherboard using a plastic opening tool.
- Use a plastic spudger to remove battery.

To reassemble your device, follow these instructions in reverse order.
